Evening Brief

Date/Time Stamp: **Monday, August 01, 2016 - 11:01 PM**

Weather Summary

***** Return to Dry and Breezy Northern NV / ID / WY Mon--Wed *****

***** HIGH RISK Tuesday for Lightning SE ID/Wrn WY/NW UT *****

Breezy SW-NW winds with gusts 20-30 mph are expected today along the edge of the Sierra Front. Winds will increase there a bit more to 25-40 mph and overspread much of Nrn NV into Srn ID Tuesday with an approaching cold front. **This same front will also produce scattered lightning across SE ID, Wrn WY and NW UT.**

In addition, poor RH recoveries 25-35% are expected at night through Tuesday over western/northern NV into Southwest ID, across thermal belts in mid-upper slopes. Temperatures will drop a few degrees today across ID behind the front.

Deeper monsoonal moisture is expected to spread from south to north across most of Utah and eastern NV during the latter half of the wee, while western areas of the Great Basin remain seasonably warm and dry, but with no significant wind or lightning issues.

Preparedness Levels

Current:

Great Basin	4
National	3

Great Basin Fire Activity: Light Initial Attack

New Fires and Acres: 18 fires for 319 acres 23,774 large fire growth

Great Basin Fire Potential Summary

***** Fuels at Record Dry Levels in Many Areas *****

ERCs have decreased significantly over eastern and southern Utah into southern NV where higher RH/wetting rains with thunderstorms developed over the past week. However, ERCs elsewhere are very high, with **many areas in the 90th to 97th percentile**. ERCs will remain high across the western and northern portions of the Great Basin where dry and breezy weather will continue early this week. Some areas of Western and Northern NV have not had measurable rain for nearly 2 months.

Live fuel moisture across much of Western UT and most of NV are near record dry levels as well.

These extremely dry fuel conditions across Nevada/Idaho/Western and Northern Utah/Wyoming will play a critical role in fire potential as lightning continues in some areas and dry/breezy weather returns to the north and west.

For more detail, see Great Basin 7-Day Fire Potential Outlook

Great Basin
Coordination Center

Resources:

- 121 Crews assigned to incidents within the Great Basin
 - 19 IHCs
- 216 Engines assigned to incidents within the Great Basin
 - 35 on preposition (today's mobilizations may not be represented yet)
 - 11 on severity
- 68 Aircraft currently located within the Great Basin
 - MAFFS 3 (Wyoming National Guard) and MAFFS 5 (Colorado National Guard) Reserved for Boise MAFFS Activation.
 - 30 Type 1 & Type 2 Helicopters
- Overhead resources in general are heavily committed
- No Buying Teams are available within the geographic area.
- All of the Great Basin's Wildland Fire Modules are committed
- National and initial attack resources within the Great Basin are heavily committed. Competition for resources is substantial.
